PERSONAL STATEMENT

I merge creativity with technical expertise as a junior software developer, leveraging my graphic design background and multimedia degree. With experience as an intern in a full-stack developer position, I am skilled in HTML, CSS, JavaScript (Node.js, React.js), PHP, Go, Java, MongoDB, and SQL. I craft interactive and visually compelling digital experiences, and I'm committed to continuous learning to stay at the forefront of technology. I am eager to contribute to innovative projects that push the boundaries of design and development, making a meaningful impact in the tech industry
